

Editorial Note TOMM Issue 11(1)

Dear TOMM readers, dear TOMM authors, dear TOMM.acm.org surfers,

As you all know, our journal is constantly improving to further adapt both to our readership and to current technological developments. Starting with the first issue of Volume 11, we would like to announce two major changes:

1. **~~ACM TOMCCAP~~ becomes ACM TOMM.** This change of the acronym is the result of an extensive discussion between the journal's Editorial Board, the SIGMM and the ACM SIGMM Executive Committee. It was a process that had already been set in motion in 2011. Two reasons have led to the final decision: 1.) Many members of our community, including both authors and readers, felt that the acronym "TOMCCAP" was not entirely suitable for the journal. Reasons include: It does not accurately communicate the journal's focus on MULTIMEDIA research; it is too long; it is too complicated; and finally, it sounds too specialized for a leading journal that aims at highlighting all aspects of Multimedia research. 2.) With a redesign of the acronym, we want to emphasize the strong and long-lasting collaboration with the ACM Multimedia conference - ACM MM - which we plan to develop and extend even further in the future.
2. The world of scientific publications is increasingly moving towards an online-only publication model. We feel, however, that a change to an online-only publication would not be in everybody's interest. A significant number of readers prefer, and will continue to prefer, a printed, tangible publication of TOMM as opposed to the pure online experience. As a compromise between increasing costs of print publications and readers' preference, we have decided to switch to a new publication model. Print issues are now published in a more cost efficient, black-and-white print, while online issues will continue to be published in color. ACM traditionally publishes black-and-white print publications in the small layout. Therefore, TOMM will be published in this layout in the future. Please make use of the new template files available on our website tomm.acm.org.

In addition to these two one-off changes, we are constantly considering how TOMM can continuously change and adapt to further improve its excellence in providing leading scientific publications to our readers.

We regularly "rotate" the members of our editorial board and aim to invite active, young and aspiring researchers from the multimedia community. During the last year, Wanmin Wu, Nuria Oliver, Pablo Cesar, Cheng-Hsin Hsu and Marcel Worring have joined our Editorial Board, while Michelle Zhou and Wolfgang Effelsberg have left after supporting TOMM in their role as Editorial Board members for a number of years. Jointly with our reviewers, every member on the Editorial Board invests much of their valuable time to arrive at a fair decision for each and every submission. Thank you all! The list of reviewers of the last twelve months, together with the number of reviews completed, is attached to this editorial note. Last but not least, I would like to mention the continuous, exceptional performance and service provided to our multimedia community by Sebastian Schmidt together with Lasse Lehmann, our TOMM information directors.

Our annual special issues traditionally address current and emerging topics in the area of Multimedia. This year's special issue is concerned with "Multiple Sensorial Multi-modal Media" and will be published in October 2014. Next year's special issue will be about "Smartphone-based

Interactive Technologies, Systems and Applications". You can find the open Call-for-Papers on our website.

If you have any suggestions, comments or feedback in regards to TOMM, please feel free to contact me.

Your TOMM Editor-in-Chief,

Ralf Steinmetz

Multimedia Communications Lab,

Technische Universität Darmstadt, Germany

TOMM Reviewers (the number in brackets indicates the number of reviews submitted in the previous twelve months)
